History

The Faculty of Medicine was established in 1995. It started with 30 students. This number has since increased reaching up to 60 students in recent years. The first Bachelor Degree in Medicine and Surgery was awarded in 2001. In 1998, a collaborative agreement between BAU and four hospitals namely the Hammoud, Makassid, Sahel, as well as Dar El Ajaza was established. This agreement provided our students with venues for clinical training in line with the undergraduates and postgraduates clinical training programs. More recently, in 2007 the Rafik Hariri University Hospital became the 5th hospital to join this collaboration.

The Faculty of Medicine strives for up - to - date programs and specializations. In 2004, specialized and postgraduate studies were launched in the following branches: Internal Medicine, Pediatrics, Neurology and Psychology.

In 2005, the first Master Degree in both "Ophthalmology" and "Surgery and Burn" Degrees was awarded. The credit hours system was applied also in 2005 across the entire faculty thus offering students flexibility and simplicity in course selection and schedules.

Furthermore, in 2006 more specialized and postgraduate programs were added to the curriculum including Obstetrics & Gynaecology, ENT, Ophthalmology, Gastroenterology, and Anaesthesia.

Vision

Provide Innovation and Excellency in medical education and research that respond to community needs and conforms to international standards in the 21st century.

Mission

To provide the community with highly qualified, competent and ethical physicians who can effectively and efficiently cope with the rapid changes in the medical practice and research, and to provide our students with up - to - date core knowledge and skills required for safe practice of medicine and ability to pursue postgraduate studies and continuing professional development.

Postgraduate Programs

Offered Degrees

The Faculty of Medicine offers Diplomas, Master and MD Degrees in the following specializations:

Diplomas

Cardiology; Chest Diseases; Community Medicine and Public Health; Family Medicine; Industrial Medicine; Dermatology, Venereology & Andrology; Internal Medicine; Neuropsychiatric, Childhood Neurological Disability and Handicap; Ophthalmology; Orthopedic & Traumatology; Parasitology; Pediatrics; Physical Medicine; Radiodiagnosis; Tropical Medicine, Gastroenterology and Geriatric Medicine.

MA & MD Degrees

Anaesthesia & Surgical Intensive Care; Anatomy; Cardiology Department; Cardiothoracic Surgery; Chest Diseases; Clinical Pathology; Clinical Pathology in Community Medicine & Public Health; Family Medicine; Industrial Medicine; Critical Care; Dermatology, Venereology & Andrology; Emergency Medicine; Forensic Medicine & Clinical Toxicology; General Surgery; Plastic Surgery; Genitourinary Surgery; Histology & Cell Biology; Human Anatomy & Embryology; Internal Medicine; Hematology; Medical Biochemistry; Medical Microbiology & Immunology; Neuropsychiatric; Neurosurgery; Obstetrics & Gynaecology; Oncology; Ophthalmology; Orthopedic & Traumatology; Otorhinolaryngology; Audiology; Parasitology; Phoniatics; Medical Parasitology; Pathology; Medical Genetics; Pediatrics; Pharmacology; Physical Medicine, Rheumatology & Rehabilitation; Medical Physiology; Radio,Diagnosis; Tropical Medicine, Gastroenterology and Geriatric Medicine.

Program Description

The duration of study for a Diploma Degree is 3 semesters (minimum) and the credit hour requirements for all Diploma specializations consist of 30 credit hours taken as follows:

- Mandatory Courses & Departmental Courses - 30 Cr.

The duration of study for the Master Degree in both the Clinical Specialization and Basic Medical Sciences is 4 semesters (minimum) and the credit hour requirements for all Master specializations consist of 40 credit hours taken as follows:

- Mandatory Courses & Departmental Courses - 34 Cr.
- Thesis - 6 Cr.

The Master Degree program involves attending lectures, clinical rounds / training, attending operating room, scientific activities, practical studies, and thesis. Clinical Specializations, however, requires completing one year (minimum) of hospital residency in the proposed field of specialization.

The duration of study for the MD Degree is 6 semesters (minimum) and the credit hour requirements for all specializations consist of 54 credit hours taken as follows:

- Mandatory Courses - 40 - 41 Cr.
- Departmental Courses - 4 - 5 Cr.
- Thesis - 9 Cr.

The MD program consists of lectures, workshops, practical classes and clinical training, application & field training, hospital rounds, conferences, self education programs, etc...
