SKILLS

- General pathologist in all disciplines.
- Clinical expertise in pathologic diagnosis, staging and prognostication of the full spectrum of gynecologic, thyroid and breast neoplasms.
- Ability to craft detailed, consistently high standard pathology reports based on a coordination of multiple types of data (Imaging findings, IHC, ISH and multiple gene assays) that impact patient treatment decisions.
- Sharing and reviewing interesting and unusual cases with a multidisciplinary disease management team that includes oncologists, surgeons, radiologists and radio-therapists and work together to render state of the art care to patients with neoplasms.
- Organizing and completing clinical and translational research projects as well as participating in ongoing interdisciplinary studies.
- Teaching skills and experience to mentor junior residents.
